Kansas City, Missouri 64106

Dear Pat:

This letter is to notify you and EPA that Square D Company, Cedar Rapids, Iowa Plant, EPA ID Number IAD000819110, generates two types of waste that contain silver that is reclaimed. One type is a silver metal scrap that may be mixed with tungsten metal, tungsten carbide metal or cadmium oxide metal. The other type is an acid stripping solution that is used to strip silver plated parts.

When we were granted our EPA ID number, IAD000819110, a letter stated that we were a regulated facility by permit-by-rule. If by having the above mentioned wastes require us to submit a Part A and Part B application please let me know.

If you have any questions or require more information so that Square D Company, Cedar Rapids Plant will be in compliance with the new regulation 40 CFR Part 266 Subpart F Paragraph 266.70, contact me by letter or telephone me at 319-365-4631.
